Remote

Open to full-time, part-time and contract work

PROFESSIONAL SUMMARY

Unity generalist working across gameplay, VR/AR, networking and UI. Building interactive products since 2019, with commercial experience in Unity/C# and frontend development. Delivered VR projects as the sole developer and contributed to a mobile RTS, industrial training simulators and AR applications.

TECHNICAL SKILLS

Development: Unity, C#, OOP, ScriptableObject, Zenject, UniTask, DOTween, Git.

XR and platforms: Meta Quest 2/3S/3, OpenXR, XR Interaction Toolkit, SteamVR, Vuforia; Android, iOS, PC.

Networking and content: Mirror, Netcode for GameObjects, Photon, PlayFab, Firebase, Azure Functions, Addressables, AssetBundles.

WORK EXPERIENCE

ME GROUP

Middle VR Developer

Mar 2026 - Present

Industrial VR training simulators | Unity, C#, Meta Quest

- Build training and assessment scenarios with step-by-step operations, action validation, guidance, error tracking and completion conditions.
- Implement interactions with equipment and tools, animations, VFX and audio feedback for Quest 2, 3S and 3.
- Extend existing code and mechanics using XR Interaction Toolkit, Zenject, UniTask, Addressables and Unity Localization.

Yellow Element

Middle Unity Developer

Sep 2025 - Mar 2026

Mobile RTS, Android / iOS | Unity, C#, Mirror

- Developed client-server interactions for PvP using Mirror and a system to record and replay battles.
- Optimized AI pathfinding for large battles, reducing computational iterations and CPU workload when moving groups of units.
- Implemented tournament brackets, result updates and debugging tools; built server-side rewards, game events and push notifications with PlayFab, Firebase and Azure Functions.

Dmitry Fursov | Unity Developer

WORK EXPERIENCE - CONTINUED

CUP LLC

Frontend Developer / VR Developer

Sep 2023 - Jul 2025

Frontend until Oct 2024; Unity VR Oct 2024 - Feb 2025; then frontend

- Built MyChessVR as the sole developer: game modes, Stockfish-assisted learning, avatar IK and lipsync, three environments and additive scene loading.
- Independently developed a drilling simulator VR demo with equipment interactions and cooperative sessions using Netcode for GameObjects, OpenXR and XR Interaction Toolkit.
- During frontend assignments, developed MyChess with React/TypeScript, its Flutter mobile client and web interfaces. Real-time product experience complements multiplayer development.

IT Tab

Frontend Developer / VR Developer

Jan 2023 - Sep 2023

React Jan 2023 - Apr 2023; Unigine VR Apr 2023 - Sep 2023

- Implemented the SARiDU VR training simulator functionality in Unigine: cooperative scenarios, instructor and assessment modes, results logging and session recording.
- Developed custom UDP networking and VOIP; worked with SteamVR, HTC VIVE Pro and Astra Linux. Earlier assignments included React website and CMS interfaces.

Yellow Element

Intern / Junior Unity Developer; later Frontend Developer

Oct 2019 - Feb 2022

Unity until Feb 2021; React / Vue Feb 2021 - Feb 2022

- Developed mobile AR applications with Unity/Vuforia; implemented AssetBundle delivery with hash checks, caching and download retries.
- Worked on OpenCV and Photon interactives, UI and content integration. Later built React interfaces for Unreal Pixel Streaming and educational portals with Vue, Apollo and GraphQL.

EDUCATION AND LANGUAGES

Donetsk National University | Computer Science and Engineering. Bachelor's degree, 2020; Master's degree, 2023.

Russian - native; English - B1; Ukrainian - B2.
