Remote

Open to full-time, part-time and contract work

PROFESSIONAL SUMMARY

Unity generalist working across gameplay, VR/AR, networking and UI. Building interactive products since 2019, with commercial experience in Unity/C# and frontend development. Delivered VR projects as the sole developer and contributed to a mobile RTS, industrial training simulators and AR applications.

TECHNICAL SKILLS

Development: Unity, C#, OOP, ScriptableObject, Zenject, UniTask, DOTween, Git.

XR and platforms: Meta Quest 2/3S/3, OpenXR, XR Interaction Toolkit, SteamVR, Vuforia; Android, iOS, PC.

Networking and content: Mirror, Netcode for GameObjects, Photon, PlayFab, Firebase, Azure Functions, Addressables, AssetBundles.

WORK EXPERIENCE

TOO ME GROUP

Middle VR Developer

03.2026 - present

Industrial VR training simulations | Unity, C#, Meta Quest

- Develop training and examination scenarios for Meta Quest 2 / 3S / 3, including step-by-step operations, action validation, hints, error logging and completion conditions.
- Implemented training and examination modes with automatic sequence validation, error tracking and scenario restart; VR interactions reduced incorrect user actions by approximately 30%.
- Moved recurring mechanics to ScriptableObject and reusable components, reducing duplicated code by approximately 25-30% and making new training operations about 1.5x faster to add.

Yellow Element

Middle Unity Developer

09.2025 - 03.2026

Mobile RTS and multiplayer | Unity, C#, Mirror, PlayFab

- Designed client-server PvP interaction on Mirror and implemented battle replay storage and playback with network latency around 80-120 ms.
- Optimized pathfinding AI for large battles, reducing computational iterations by approximately 50-60% and CPU load by 30-40% during simultaneous unit movement.
- Built tournaments, game events, rewards and push notifications with Firebase, PlayFab and Azure Functions; also delivered gameplay mechanics for a mobile RTS and Vulkan Verse.

Dmitry Fursov | Unity Developer

WORK EXPERIENCE - CONTINUED

CUP LLC

Frontend Developer / VR Developer

09.2023 - 07.2025

MyChess, MyChessVR and drilling VR simulator | Unity, C#, Netcode

- Solely delivered MyChessVR: classic chess, puzzles, Stockfish training, IK interactions, avatar lipsync, three locations and additive scene loading.
- Independently built a drilling VR simulator demo with industrial equipment interaction and cooperative sessions on Netcode for GameObjects, OpenXR and XR Interaction Toolkit, synchronizing actions with latency up to 100 ms.
- During frontend phases, developed MyChess with React/TypeScript and a Flutter mobile client; realtime product experience complemented the networked gameplay work.

IT Tab

Frontend Developer / VR Developer

01.2023 - 09.2023

React 01.2023 - 04.2023; Unigine VR 04.2023 - 09.2023

- Solely delivered the core functionality of an industrial VR simulator on Unigine/C#, including client-server architecture, multiplayer, examination logic, avatars and VOIP.
- Implemented training and operator modes with real-time action monitoring; all training sessions stored results and completion history.
- Synchronized equipment and user actions with latency below 80 ms, integrated custom VOIP and adapted the solution for HTC VIVE Pro, SteamVR and Astra Linux.

Yellow Element

Intern / Junior Unity Developer

10.2019 - 02.2022

Mobile AR applications | Unity, Vuforia, OpenCV, Photon

- Designed on-demand 3D content delivery through AssetBundles with caching and version control, reducing the client build size by approximately 4x.
- Developed commercial AR applications for Android and iOS with Unity/Vuforia, interactive projection systems with Unity/OpenCV and networked interactions with Photon.

EDUCATION AND LANGUAGES

Donetsk National University | Computer Science and Engineering. Bachelor's degree, 2020; Master's degree, 2023.

Russian - native; English - B1; Ukrainian - B2.
